

Winter Quarter Average

AlexRenew calculates your Winter Quarter Average based on your water use history from December through February to help ensure you are only billed for water you use that goes down the drain and ends up at our plant for treatment.

Visit alexrenew.com/winteraverage to learn more.

Alexandria's Water System

In Alexandria, three separate entities manage the water system: Virginia American Water delivers potable water to homes and businesses, the City of Alexandria maintains the sewer collection and stormwater systems, and AlexRenew captures flows with large interceptor pipes and treats the wastewater before returning it to the Potomac River. Visit alexrenew.com/what-we-do to learn more about how water works in Alexandria.
