TERIARY SYSTEMS UPGRADE PROJECT

AlexRenew is rehabilitating our processes providing final settling and filtration of wastewater to further reduce nutrient loads and allow for growth in our community. The project, known as the Tertiary Systems Upgrade Project, will be procured as a progressive design-build. We're looking for qualified engineers and contractors to help us execute these upgrades.

Tertiary Systems Upgrade Industry Outreach Event

Staff will provide an update on the tertiary systems upgrade project, studies completed to-date, anticipated schedule, and draft procurement approach.

This event will be supported by our Owner's Advisor team (Carollo Engineers)
